

GEDY  
LA G CHE ARREDA LA VITA

TOP DESIGN WATER

GEDY realizza oggetti belli da vivere tutti i giorni. Disegnati e progettati da famosi designer di tutto il mondo, i prodotti GEDY si distinguono per funzionalità, praticità, stile.

Gedy makes beautiful items to use every day. Conceived and designed by famous designers from all over the world, the uniqueness of Gedy products for functionality, practicality and style is always very clear.

High tech e funzionalità descrivono compiutamente le nostre collezioni, sviluppate e prodotte in acciaio inossidabile per proporre una qualità che duri nel tempo. Le collezioni, con il loro aspetto privo di ornamenti, testimoniano una ricerca formale tesa ad esprimersi attraverso la propria costituzione. La loro intenzionale semplicità è stata progettata per integrarsi spontaneamente con il Vostro habitat.

High tech solutions and good functionality qualify our collections, developed and produced in stainless steel to guarantee an ever lasting quality. The collections look extremely clean and simple, as an indication of the company's interest in formal research. Indeed, their distinguishing sobriety has been specifically designed to be fully and harmoniously integrated with your personal environment.

La principale caratteristica dell'acciaio di essere inattaccabile dagli agenti esterni viene ulteriormente esaltata dai trattamenti termici (ricottura a 1200°C) ed elettrolitici (decapaggio e passivazione) a cui i prodotti vengono sottoposti.

Prova di ciò è la resistenza dei nostri prodotti senza alcuna ossidazione al rigoroso test di controllo in camera a Nebbia salina per 240 ore.

Tutto ciò si traduce in assoluta igienicità e maggiore durata dell'intera gamma.

The primary characteristic of the steel is that is it susceptible to external agents is further intensified by the thermal treatments (annealing at 1200°C) and electrolytes (pickling and passivation) to which the products are subject.

The proof is in the resistance of our products without oxidation to the rigorous control test in Salt spray chambers for 240 hours.

All of this translates into excellent sanitary conditions and a longer lasting product for the entire line.

La scelta strategica di produrre rubinetti in acciaio, ci ha consentito, oltre che rispondere ad esigenze estetiche molto apprezzate da designer ed architetti, di sviluppare mercati in cui le caratteristiche dei nostri prodotti possano essere realmente efficaci, come, ad esempio, alberghi, spa, strutture ospedaliere e comunità dove i plus dell'igienicità e della facilità di mantenimento sono discriminanti.

The strategic choice to manufacture taps in steel permitted us not only to respond to the aesthetic demands which are very much appreciated by designers and architects, but to also develop markets in which the characteristics of our products can be really effective, such as, for example, hotels, spa, and hospital facilities where the extra sanitary conditions and easy maintenance are discriminative.
